Studio Drift Swarms the Sky

Studio Drift will see its latest project take flight on Dec. 6. The Amsterdam-based design collective, which explores cross-sections between technology, art and nature, has created “Franchise Freedom,” an autonomous aerial installation of 300 drones programmed to imitate natural flight. The performance piece will have public nighttime viewings at the Faena Hotel Miami Beach in conjunction with BMW and Pace Gallery from Dec. 7-Dec. 10.
